

TVA/UCEMC POWER OUTAGE PLANNED

The Tennessee Valley Authority (TVA) will disconnect power to Upper Cumberland Electric Membership Corporation members served from the Livingston Substation that reside in the communities of the Town of Livingston, Allons, Hilham, Timothy, Turkey Town, Windle Community Road continuing to West McCormick Road, Monterey Highway, Highway 136 and Upper Hilham Highway. The interruption of power will begin at 10:00 P.M. CST, Saturday, October 28, 2017 for up to eight (8) hours into Sunday Morning, October 29, 2017.

The power interruption is needed by TVA to do necessary maintenance on their equipment.

UCEMC will take advantage of the outage to do necessary maintenance on its equipment.

Jimmy Gregory, UCEMC General Manager, states that although regrettable for any inconvenience the planned outage may cause, this maintenance must be performed to maintain reliability on our system.

The power outage will be postponed if inclement weather, which includes lightning, is in the area or is expected in the area at the scheduled time of the power interruption.

Please contact your local UCEMC office or visit our website www.ucemc.com for further information relative to the planned power outage in your area.
